## **Shareholder Disclosures Monitoring**

Funds-Axis Shareholder Disclosures provides automated monitoring of global shareholder disclosure rules across 80+ countries on a single platform.

This includes the monitoring of:

- Major Shareholdings
- Takeover Disclosures
- Short Selling
- Foreign Investment Rules
- Sensitive Sector Rules

### **Key Features**

- Comprehensive rules engine
- Pre-configured package of disclosure rules
- Decomposition of indices and baskets
- Early warning thresholds
- Aggregation at multiple levels
- Single click report generation
- Full disclosure workflow

### **Product Summary**

Flexible Deployment	Availability as a hosted or installed solution
Minimal Data Requirements	Minimal data is required. Simply provide sedol or isin + quantity Existing data integrations with over 20 Administrators Full provision of all voting rights data (if required)
Extensive Rules Library	Pre-installed rules and reports
Transparency	Full data history Quick drill-down of aggregated holdings to individual position level
Support	Technology-only solution or fully managed outsourced service
Security	Full maker-checker and audit trail

### 2. The User Experience

(i) Disclosures are viewed in the Disclosure / Breach Management Framework.

## 3. Behind the Scenes

#### SETTING UP YOUR GROUP STRUCTURE

Typically Shareholder Disclosure rules apply at (i) group level, (ii) delegated investment manager level, or (iii) controller of voting rights level.

Users can flexibly define their entire organisational structure. Each rule then operates based upon this, taking into account parents and subsidiaries as required.

Repo						unds Axi

#### SET-UP OF DISCLOSURE RULES

The solution features pre-configured disclosure rules.

New rules can be easily added by selecting:

- Disclosure thresholds
- Legal entity application e.g. group, discretionary manager, legal entity etc.
- Relevant numerators and denominators (e.g. voting rights, issued capital)
- Forms to be populated
